Subject: Approach to background section in allocation report

Hi Alice and Kate:

I just wanted to confirm, AlterEcho is going to directly copy and/or reference text from EPA-issued documents such as the ROD and RI/FS to complete the background section of the Draft Allocation Report. We will not create any text for this section that has not been previously released by EPA. Thus, we were not planning to send to you (tomorrow) the Background section of the draft report for EPA's review.

If you have any issues with that approach, please let me know.

Thanks!
Rob Young
